PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building web and mobile applications, from Figma design to working code. Currently building a cross-platform Flutter app for Globalevel, a work-management SaaS platform, after designing its complete 148-screen product experience and design system. Works across Flutter, React, TypeScript, PHP and Supabase, with real-time features, database-level security and UI/UX design. Has trained and mentored 40+ students in software development. BSc Computer Science, Second Class Upper.

EXPERIENCE

Mobile App Developer (Freelance) · Globalevel

Remote · Sep 2026 – Present

- Designed the complete mobile experience for Globalevel, a work-management SaaS platform: 148 screens across 16 feature areas, including onboarding, tasks, projects, goals, dashboards, team management, integrations and settings.
- Built a design system of 20 colour tokens with light and dark modes, so the whole app changes theme from a single setting.
- Delivered a clickable prototype of 190 linked frames and 634 links, with zero broken links, so the client could review real user flows before development began.
- Designed 20+ empty, loading, error, offline and sync-conflict states, so users always know what happened and what to do next.
- Wrote developer handoff documentation covering navigation, validation rules, layout and motion specs.
- Building the iOS and Android app in Flutter with Riverpod and go_router; the theme, shared component library and navigation are in place, with completion expected in November 2026.

Founder · TechVerse

Remote · Oct 2025 – Present

- Founded a tech startup offering website, web app and mobile app development, UI/UX design, IT support and database administration for small businesses.
- Defined the service offering, brand and online presence, and lead client outreach, including a targeted campaign to service businesses ahead of the festive season.

TECHNICAL SKILLS

LANGUAGES

Dart | JavaScript | TypeScript | PHP | SQL | HTML5 | CSS3

MOBILE

Flutter | Riverpod | go_router | Cross-platform iOS & Android

WEB

React | Bootstrap | Tailwind CSS | Responsive web design

BACKEND & DATA

Supabase (PostgreSQL, Realtime, Row Level Security) | MySQL

DESIGN

Figma | UI/UX design | Design systems & colour tokens | Prototyping | Light & dark theming

TOOLS

Git | GitHub | Xcode | Android Studio | VS Code

PRACTICES

Code review | Technical documentation | State-machine design | Role-based access control

EXPERIENCE (CONTINUED)

Software Engineer · Globaltech World Computer Institute

Full-time · Sep 2024 – Feb 2026

- Developed and maintained responsive web applications with PHP, JavaScript and Bootstrap, turning business requirements into working features across the front end and back end.
- Built a banking application prototype for GlobalTech Microfinance using PHP, JavaScript and Bootstrap.
- Integrated databases and APIs, fixed production issues and improved application performance.
- Trained and mentored 40+ students in software development.
- Took part in code reviews and maintained technical documentation.

PROJECTS

Dingo, Food Delivery Platform

Flutter · Dart · Supabase · In development

- Cross-platform food-delivery app connecting customers, riders and restaurants.
- Real-time rider tracking with Supabase Realtime subscriptions, so customers see live locations without polling.
- Row Level Security policies in PostgreSQL ensure customers, riders and restaurants can only read their own data, enforced at the database layer.
- Order lifecycle modelled as a state machine for predictable status changes across every screen.

github.com/Asogbon1/dingo

EntrepreLearn, Gamified Learning Platform

React · Final-year project

- Built a web platform that teaches entrepreneurship to students through interactive learning games.

github.com/Asogbon1/EntrepreLearn-Gamified-Learning-Platform

Personal Portfolio

HTML · CSS · JavaScript · Three.js · Live

- Responsive single-page portfolio with a 3D WebGL hero and glass-style interface, presenting projects, services, experience and contact details. Deployed on Vercel.

EDUCATION

BSc Computer Science

Caleb University, Lagos · 2021 – 2025

Second Class Upper (3.61 / 5.00). Final-year project: EntrepreLearn.

Professional Diploma in Software Engineering

African University of Science and Technology (AUST), Abuja, offered through GlobalTECH · Sep 2025
